

Test Report

Generated by SurveySnap AI Engine • Date: August 03, 2026

1. Executive Summary

This document presents an automated intelligence analysis. The analyzed dataset consists of 25 total records across 3 data fields. Data quality score indicates a missing value density of 0.0%.

2. Primary Statistical Overview

3. Risk & Trend Assessment

Overall Data Risk Index: **30/100 (Medium Risk)**.

Key Observations: Found 25 duplicate rows in raw data

4. AI Strategic Recommendations

- Normalize continuous numeric features to stabilize downstream model predictions.
- Impute missing records using median metrics to maintain dataset integrity.
- Filter identified outliers using 1.5x IQR boundary clips.
